LinkedIn Github Portfolio

## Education

**Digital Crafts | Software Development - Certificate of Completion**

- A full time on-site software development bootcamp training course covering full stack development including frameworks like React/Redux and server-side technologies including Node.js, Express, And PostgreSQL.

**Art Institute Of Atlanta | Graphic Design**

- I went to the Art Institute Of Atlanta where I studied Graphic Design and Animation. I attended classes such as Composition, Photoshop and Color Theory, Fine Art/ Figures, and English.

## Technical Skills

- **Languages:** Html | CSS | Javascript | Java
- **Frameworks & Libraries**: React.js | Express.js | Bootstrap | Three.js | Node.js | Sequelize.js | EJS | Trap Code Particular
- **Technologies**: VsCode | SQL | Git | Github | Render | Vercel | Agile | Jira | Photoshop | After Effects | AWS | Davinci Resolve | Illustrator | InDesign | Fl Studio |

## Software Development Projects

Bootstrap Demo: Github | HTML | CSS | Bootstrap |
- This site was made as a demo site to show what I had learned in bootstrap. For the project we were tasked to make a site that was based off our favorite show, for my site, I chose Aqua Teen Hunger Force. It was very difficult getting the grid to work for me at first because I had just learned it, but after this project, my CSS grid skills have greatly improved.

- Made to showcase what I learned in Bootstrap.
- Fully Stylized Page.
- Image Icon NavBar.

Capstone Project: Github - | React | CSS |
- This website was made for our final Capstone project. It's a Tamagotchi style virtual pet game. I designed and styled the entire page. I made all the designs as well using Blender and Procreate. This project was made using React and CSS. The hardest part of this project for me was making sure all of the graphics were done In time to submit the project, as 3D graphics take a lot of time to animate.

- Designed and Styled the entire page.

- Created and animated all of the 3D graphics in Blender.
- Created concept and plan for the entire project.

[Peppa Plug](): [Github]()- | EJS | CSS | SQL |
- This site was made for my group's backend project. The concept was a blog for pepper lovers. If you love peppers, you can read more information about them, discover new peppers, and discuss and rate peppers on the blog. I contributed most of the html and all of the css and styling for the page.

- Created Blog for pepper lovers using EJS, CSS, and SQL.
- Designed and Styled the entire page.
- Made Peppa Plug Logo in Blender.

## Work Experience

**Slutty Vegan ATL, Jonesboro, GA - Social Media Manager/Corporate Graphic Designer & Restaurant Shift Supervisor**

- My role at Slutty Vegan involved team management in Jonesboro, where I also assumed various positions within the restaurant. Additionally, I was in charge of the social media management and contributed to promotional and merchandise graphic design in the corporate.
